THE REAL COST OF WAITING FOR 5 YEARS

RENTING

You pay every month, but you build **no** long-term wealth or **ownership**.

At the end of five years, the property **still belongs to someone else**.

OWNING

Every monthly payment helps build **equity** and long-term financial security.

As property values grow, your **investment** and future **wealth** may grow too.

The right time to start building your future may be **sooner** than you think.
